Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 29, 2004 has been entered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Mark Kresloff (Reg. No. 42,766) on October 05, 2005.

3. The application has been amended as follows:

In **claim 14**, in line 2, --first side of a-- has been inserted before "substrate";
in line 7, --a second side of-- has been inserted before "the substrate"; and
in line 9, --after forming the reflective layer-- has been inserted after "etching".

In **claim 39**, in line 9, "second epitaxial layer" has been changed to --substrate--; and

Art Unit: 2825

in line 11, after "ion beam etching", the following has been inserted:

--, wherein the scribe line is formed after forming the reflective layer--.

4. The following is an examiner's statement of reasons for allowance:

Claims 1-13, 27-29, 31-33, 35-38, 49-54, 61-66, 67-72 and 73-78 are allowed primarily because the references of record, singly or in combination, cannot anticipate or fairly suggest at least the following limitation (in combination as recited in independent claims 1, 27, 31 and 35): reducing a surface roughness of the transparent substrate using a dry etching process prior to forming a reflective layer on the transparent substrate, i.e., the process flow is shown in Figs. 3E-3F.

Claims 14-24, 39-41, 43-48 and 55-60 are allowed primarily because the references of record, singly or in combination, cannot anticipate or fairly suggest the following process steps (in combination as recited in claims 14 and 39): forming a reflective layer on the substrate followed by forming a scribe line by specifically using inductively coupled plasma reactive ion beam etching.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
